## **A. CONTRACT CONDITIONS**

### **A: Contract Conditions**

§ 1 \_\_\_\_\_ (customer) commission the veterinarians of the equine practice Korntal-Münchingen , Dr. H Leinemann (contractor) for the examination of the horse \_\_\_\_\_

The extent of the examination is determined by the customer and specified in N. 10 Chapter 1 & Chapter 2 , as well as N. 12 and confirmed in this protocol. All possible examinations which are not named and signed within this protocol can not be included in this pre-purchase examination. The content of this contract can only be amended by a written agreement.

§ 2 The examination serves as a statement of the health condition of the horse at the time of the examination. The examination does not serve as declaration of defects in the legal sense. Stereotypies like weaving or crib biting, housing dependant chronic bronchitis, allergies and particular diseases of the upper airway tract, that are only assessable after intensive exercise cannot be assessed. The examination does not include assessment of these disorders. The examination will also not give predictions about the conformation of the horse and how this will influence the breeding or sport career of the horse.

§3 The veterinarian is not obliged to explain the risks of all the single steps of the examination, as far as the extent of the examination does not differ from what we described. The customer agrees with the handling procedures that need to be undertaken during the examination. The customer guarantees that the owner of the horse also agrees with this.

§4 It is understood and agreed that the results of the examination may be discussed with the vendor/owner and purchaser of the horse but not any third party. However, the customer in this case, may at his or her discretion not allow disclosure to any other party, including the vendor/owner. The examination protocol is only meant for briefing the customer. The veterinarian needs to give his or her consent if the protocol should be delivered to any third party.

§ 5 The assessment of the obtained findings (Part C of the examination) is done with the greatest possible care of the veterinarian and reflects his or her opinion. A prediction about the future development of the health status, performance, and application cannot be determined, because it is a living animal that develops its constitution and condition constantly. A decision about the purchase or sale can only be taken by the customer.

§ 6 The costs for the clinical standard exam, (without radiology etc.), are based on the purchase price of the horse, obtained from the customer personally. If the purchase price of the horse stays under € 5.000 the costs are €180.- excl. VAT. If the price of the horse exceeds 5.000, the price of the clinical exam rises with 0.5 % of the purchase price/value. The customer knows that the liability rises when the purchase price rises considerably. It will not be possible to change the purchase price/value of the horse after the examination has been started.

The customer or the authorised person hereby personally confirms and is bound to the purchase price/value of the above mentioned and to be examined horse in this contract.

**A) Read and accepted:**

**Signature:** \_\_\_\_\_

**§7 The contractor is liable for an amount that is not higher than that of the purchase price/value of the horse to a maximum amount of € 150.000. When higher liability cover is required, the customer should discuss this before the start of the examination with the contractor. The Veterinary Practise Korntal - Münchingen, Dr. H. Leinemann and this should be accepted in written form. This is not possible after the examination. The same liability cover applies to any persons authorized in the contract. Other third parties are not able to claim on the clinic. A fund of living expenses (costs for stable, feeding, care, horseback riding, veterinarian and horse shoeing) on the one hand and a charging for utilization on the other hand does not take place.**

**§ 8 When there are no individually negotiated terms for limiting the period of prescription, the statute of limitations is valid for one year. This means that legal proceedings can only be initiated by the customer or other authorised persons mentioned within the contract, within the the period of one year, beginning with the start of the legal statute of limitations. The final statute of limitations occurs at the latest, five years after the date of examination.**

**§ 9 The country of examination is independent of the agreed conditions and process of examining in this contract. Even for examinations outside Germany, the German legal Court is the only Court who can apply for assessing the conditions of this contract. Third parties are included as well. Area of jurisdiction is the District Court of Ludwigsburg (Amtsgericht Ludwigsburg).**

**§ 10 Definition of Examination Part I**

**Prices in €  
Without VAT**

**Confirmation  
Signature**

## **Clinical Examination following the attached protocol B.I. B. IV.**

The price of the examination is made up of a basic fee of € 180,00 plus 0,50 % ( + VAT 19%) of the purchase price/value if this value of the horse is more than € 5.000. In case the pre-purchase examination is terminated by the customer during the clinical examination, only the basic fee of €180,00 needs to be paid.

180,00 € plus 0,5 % of the purchase + VAT 19%

§ 11 The customer is obliged to pay for the radiographs and the assessment of the radiographs the or she has selected and signed for on this form. These are the property of the contractor. You are not obliged to publicize them. Copies can be obtained on request which will incur additional costs.

Assessment of other, previously taken images (radiographs, ultrasound images etc.) is only possible when they are signed by the veterinarian who was responsible for these images.

§ 12 Special agreements/demands for the pre-purchase examination:

§ 13 Should one clause in this contract be partially or entirely ineffective, the contract as a whole will not be affected. The examination report and its content is subject to the laws of the Federal Republic of Germany with the exception of any conflicting standards where applicable. The German and the English texts of the examination report shall be equally authentic; in the event of any inconsistency between the German and the English text, the German text shall prevail and is legally binding.
